

## Worksheet 4.2 Curriculum Outline

See Module 4: *How Do You Design a Curriculum? Part 2: Curriculum Outline*

---

Create an organized list of topics for your course or curriculum. Your content outline should include only topics—essential knowledge and skills—for achieving the goal.

Have someone review your work.

---

**First**, list all content topics and subtopics that might apply to your course.

**Second**, edit the list by deleting those topics that are not essential to achieving the goal, and by combining similar topics.

**Third**, arrange your topics in a meaningful sequence of units, for example: prerequisites first, easy to more difficult, top to bottom, mnemonic, etc.
