Email: stacey.pylman@hc.msu.edu

Stacey Pylman, PhD is an assistant professor in the Office of Medical Education, Research, and Development (OMERAD) in the College of Human Medicine (CHM) at Michigan State University. Pylman leads instructional coaching and curriculum design faculty development for CHM faculty. She works directly with community faculty and MSU faculty on teaching and learning projects that focus on teaching effectiveness, coaching skills, active learning strategies, and promoting UME and GME student learning.

Pylman has spent the last four years working with and researching classroom teachers mentoring beginning teachers. Pylman served on the leadership team of the Mentors as Teacher Educators (MATE) project in the MSU College of Education Teacher Preparation Program. Results of her research on mentoring have been published and presented at conferences. In OMERAD, Pylman is co-designing a new medical education certificate program for physicians who teach in the new MSU Shared Discovery Curriculum. Pylman will continue her work helping faculty and clinician educators coach the next generation into the profession of medicine.
